

TOTALGARD CORP

TotalGard Corp

Orthodontic Multisport Mouthguard and Stressgard TMD Splint

Since its inception, TotalGard Corp has been providing the best orthodontic mouthguards to the industry. With all of its unique features, the TotalGard sports mouthguard has become the No. 1 choice of orthodontists. With flexible extensions, an anterior bite rim, and a large breathe hole, the TotalGard provides maximum comfort and protection for all your orthodontic patients. TotalGard is packaged individually, so you can order any combination you would like from the company's three sizes, nine colors, and strapped or strapless varieties. TotalGard is the only company that provides three sizes for different age groups. It has continually made every ef-

fort to allow you to order exactly what you need.

TotalGard introduced the Stressgard in 2000, and it has become very popular. Stressgard is designed as a temporary splint for use in dealing with TMJ pain, clenching, and grinding problems. It is ideal for initial, intermediate, or long-term use.

This year, TotalGard is proud to introduce the Stressgard II. Stressgard II is made of the same material as the Stressgard. What is new is the natural archform of the bite tabs and the full occusal contact. TotalGard is very excited about the Stressgard II and feels it will be a great addition to its product line.

stressgard

by TotalGard

Stressgard can be used:

- as a nightguard for clenchers and bruxers
- as a temporary splint while an acrylic splint is being made
- as a treatment for stress-related muscle fatigue (especially for mothers of patients)

Stressgard:

- ready to use
- comfortable
- reversible (for use on upper or lower arch)
- zero chairtime
